## Introduction

### Collections

- The Library has a tremendous collection of treasures from old and modern sources, which have added to its reputation and role in promoting and expanding the history of science and art.
- In the following, some of the most important collections available at the Library are briefly explained.

### Manuscripts

### Lithography and movable-type books

The collection of Lithography and movable-type books includes about 24,700 volumes, which are very valuable in terms of scientific content and the history of the printing and publishing industry.

### **Printed Books**

The Main Library

The Iranian Studies Library

# National, international and historical documents

### **Periodicals**

### Majles Yar application

In order to facilitate the provision of services to MPs and move towards the realization of the Green Parliament, the Majles Yar app was developed earlier this year by the Iranian Parliament's Information Technology Division.

The Majles Yar app is used by MPs on the following issues:

- Send the daily agenda to the MPs;
- 2. Search on the rules database;
- 3. Searchable database of parliament negotiations;
- 4. Submit a speech request by a Member of Parliament;
- 5. Search on the library information databases;
- 6. Research services to MPs;
- 7. Other administrative services such as audio, video, and so on.

#### Virtual Reference Services to MPs

- MPs Virtual Reference Desk is a management dashboard, which, in addition to providing a personal library, enables the access to the specialized information required by each of the MPs on various topics and with regard to the work of the relevant committees.
- This tool helps to provide insights and solutions that rely on the scientific, historical and political resources of the day to better draft laws and regulations in Parliament.
- These services are available in two ways:
- Just in time Services at the Parliamentary Meetings;

In this service, the MP during a general meeting can chat with the expert librarian via his/ her PC and ask for brief and concise information.

2 Comprehensive services;

These services are more comprehensive and all information and resources requested by MPs, including books, articles, etc., are in pdf format or audio and video files provided to MPs in the shortest time as an information package via the Majles Yar app or an e-mail.
