

# AN ECOLOGICAL LEARNING CENTER

**Assane FALL**

**Manager Lambaye Learning Center**

# About lambaye Learning Center

- A modern library located in a rural area
- Supporting young people in education, culture and digital access
- Promote women's financial autonomy better living conditions for rural people

# Our furniture made from recycled plastic waste :

In its ecological policy, the lambaye library promotes the recycling of plastic which contributes to the conservation of a healthy environment.

# Our furniture made from recycled plastic waste (after) :

The library says yes to the circular economy to optimize the use of our raw materials.

# Green spaces and micro gardening

We have a large green garden and a micro-gardening space to train young people and women in environmental education

# An incinerator for waste treatment

The municipality of Lambaye does not have an effective means for waste management. Our incinerator will solve the problem and help preserve the environment

# Solar energy

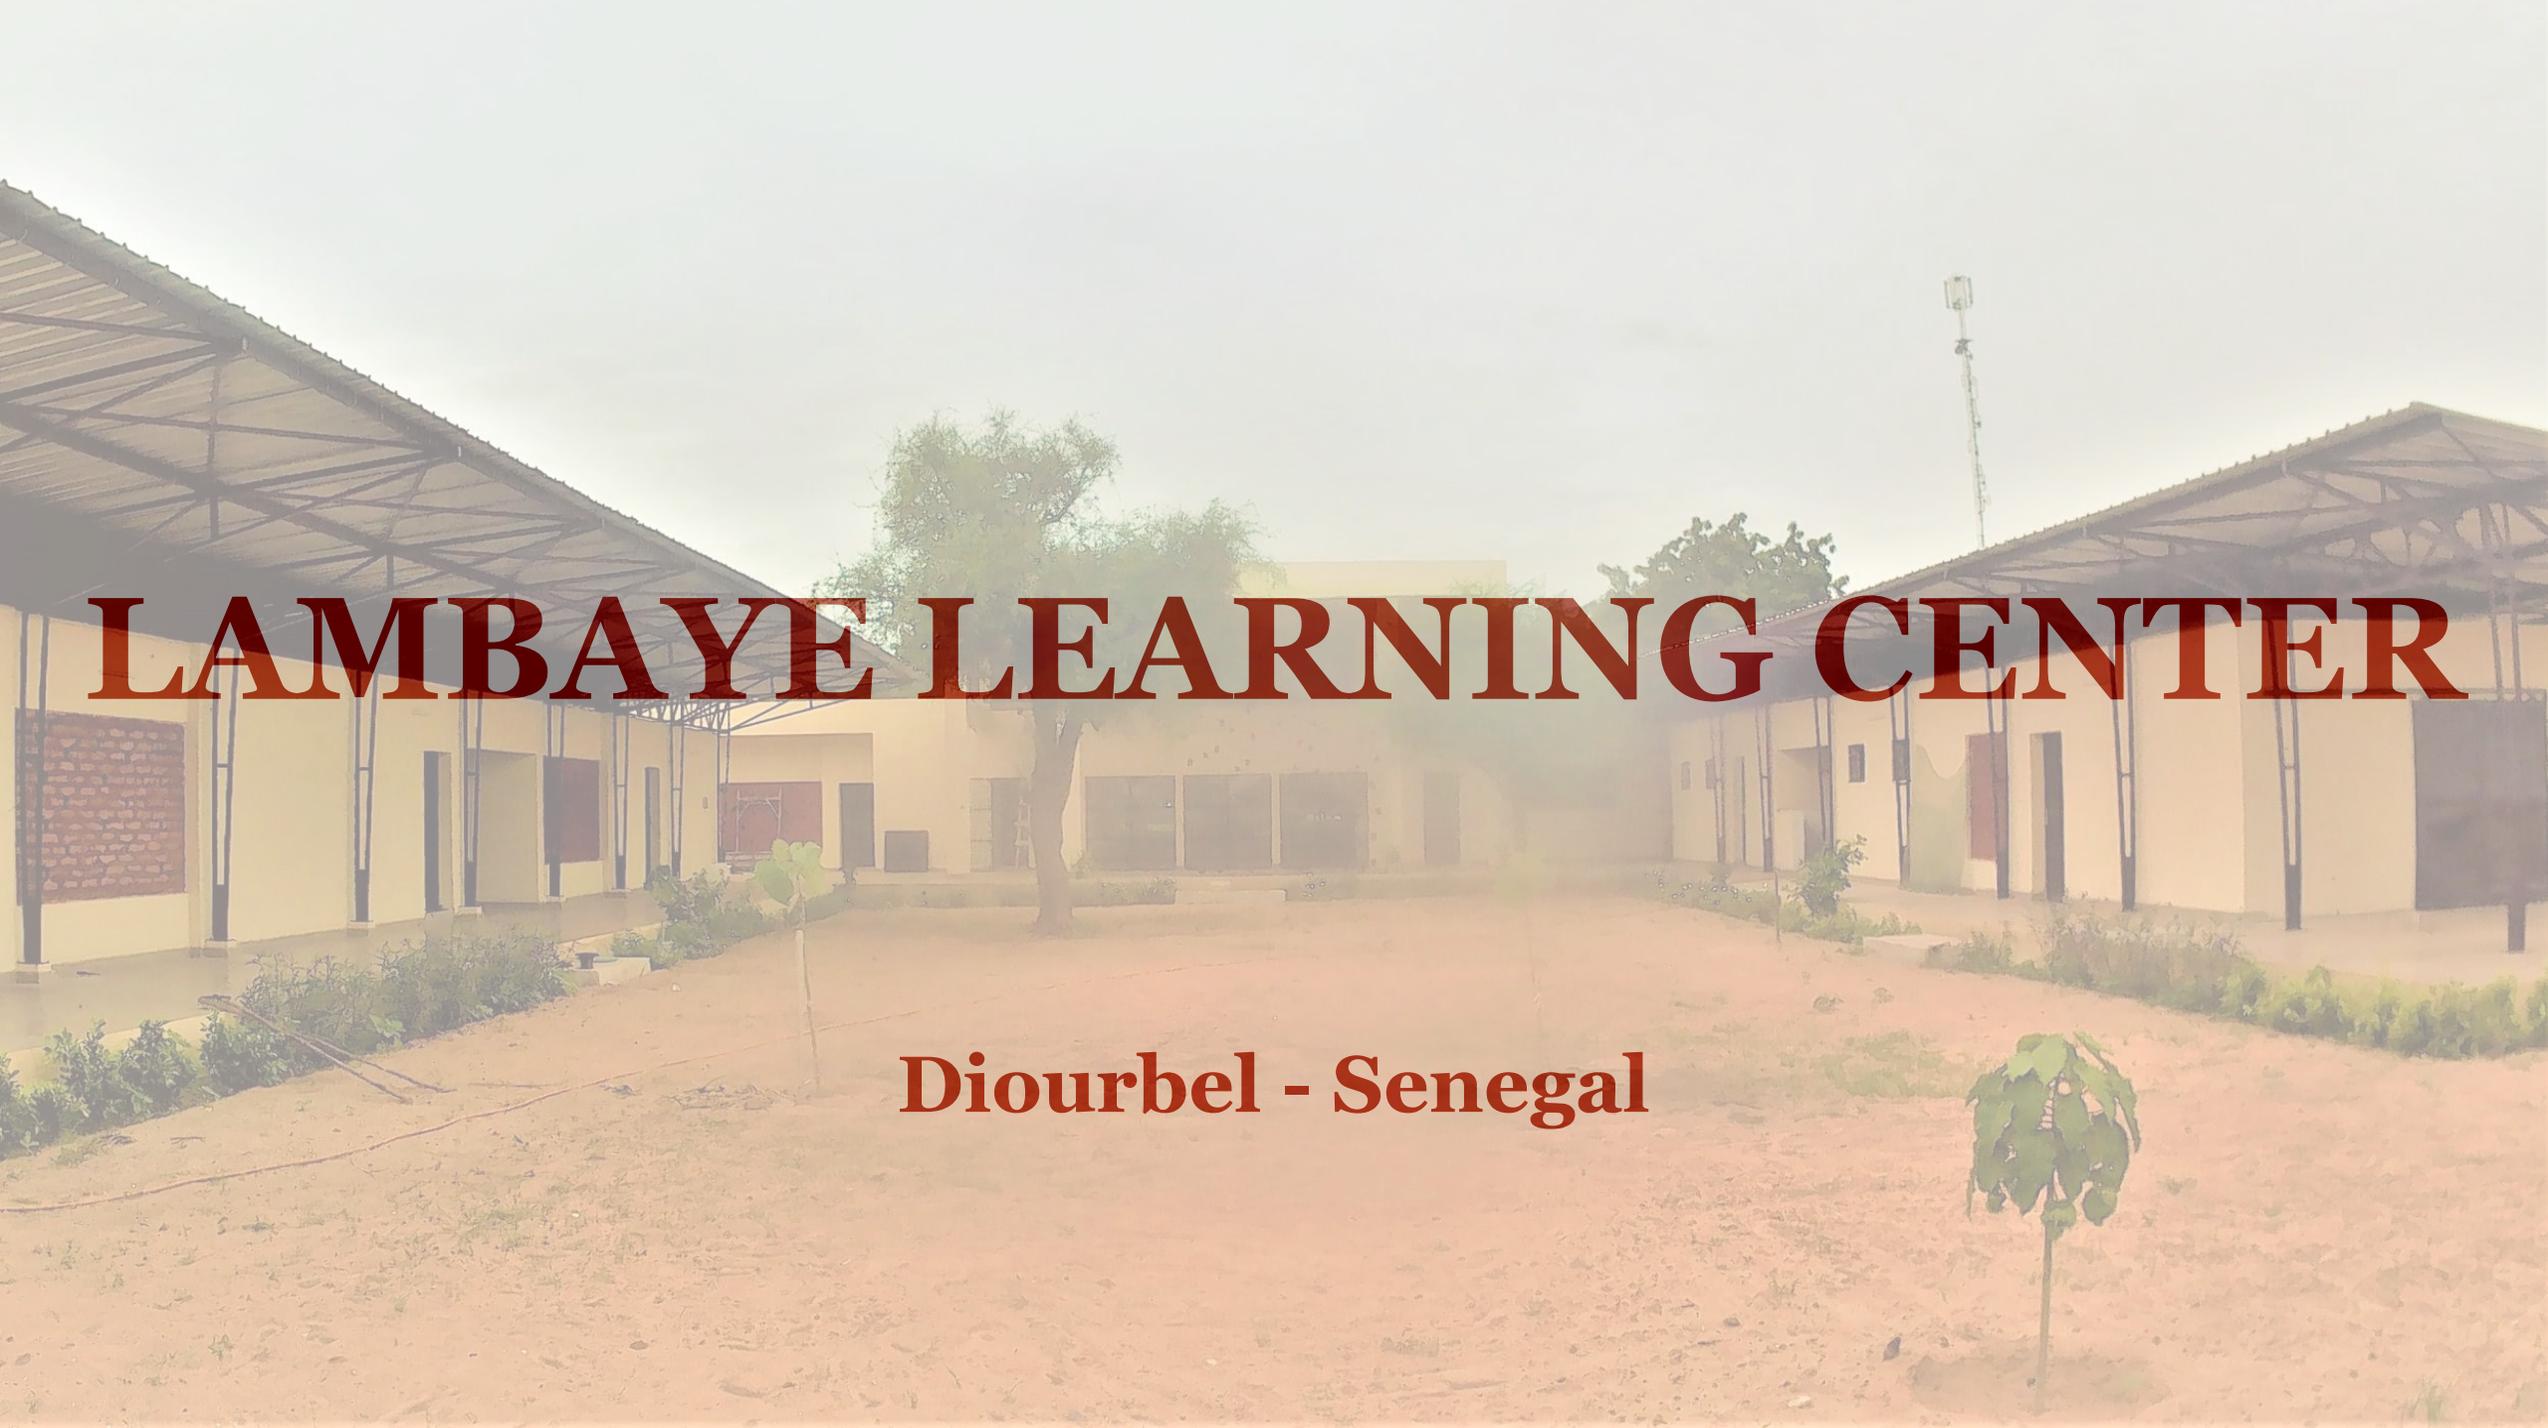

Solar energy is renewable energy and, therefore, it is inexhaustible with low pollution and respects the environment.

# An intelligent rainwater management system

The center has an installation system that stores rainwater in reservoirs to reuse it in watering the garden. A way to reduce the consumption of tap water.
