		How will you communicate your activities and results?		
		Through conference sessions, developing an oral history of librarians, perhaps a possible book, IFLA project/s; through interactive and accessible media to all audiences. Might be we could take advantage of Digital Humanities capabilities and have a website using storytelling maps, GIS, etc. Its success could be measured by how many visitors the site had and/or how many new oral history project are added to the site.		
		How will you measure the impact of your activities?		
		<ul style="list-style-type: none"> • By attendance at IFLA conference sessions organised by the SIG on library history issues and what can be learnt from them; • By interest and engagement of the profession around the world as the oral history project develops; • By success in gaining funding for the oral history project/s when such is required; • By working with other IFLA groups with an interest in historical components of their work as it pertains to library history 		
		Identify other Unit(s) which may be interested in this Focus Area, or with which you could collaborate on projects/activities.
