# Choc Edge

creating your chocolate in style

Technology That's Good Enough to Eat

chocolate. We love technology. That's why Choc Edge

leading the way in the exciting field of 3D chocolate, we're literally offering people a taste of the future. We produce the Choc Creator 3D chocolate printer. And what's more, we use only 100% Belgian chocolate, so everything we do is good enough to eat.

## Choc Creator

Choc Creator is a versatile and precision desktop machine developed to allow individuals and businesses to create their own unique chocolate designs in either 2D or 3D. It plugs in to any computer using a USB port so users can create their own designs, or download ones provided by Choc Edge.

A range of chocolates can be used to print intricate designs onto various flat surfaces including cakes, biscuits, dishes, and paper.

## As Seen on TV

Since we launched the Choc Creator in 2011 it has grabbed the attention of the world. In Britain, we've been seen on Stephen Fry's TV programme *Gadget Man*, and on BBC1's flagship *The One Show*.

Choc Creator machines have been sold globally to companies in Brazil, Colombia, the USA, China, Singapore, France, Germany and more. Claims include marketing fees, chocolates and cake-makers.

If you want to learn more about Choc Edge, and haven't had the chance to see a Choc Creator in action for yourself, why not visit our website to find out more? You can find us at [chocedge.com](http://chocedge.com), and you can also follow us on Twitter @ChocEdge, on Facebook at [www.facebook.com/ChocEdgeLtd](http://www.facebook.com/ChocEdgeLtd), and on YouTube.
