Notes on Field Contents

Under certain practices additional parallel forms of the access point, in a language other than that which is the valid form under the Language of Cataloguing specified in field 100, character positions 9-11, may be

specially identified and carried in this block. For each parallel access point the language of the catalogue into which the access point fits is recorded in a $8 subfield.

These fields are also used to record alternate script representations of the 2-- record authorized access point when another record exists for the alternative script access point and its reference structure. For an alternative script access point, a $7 Script of Cataloguing and Script of the Base Access Point subfield is added to the 7-- field. (A $6 Interfield Linking Data subfield is not required since all access points in 7-- fields link to the access point in the 2-- field by definition.) The fields in this block are repeatable to accommodate multiple access points.

The subfields in the 7-- block have the same definitions and specification as the equivalent subfields in the 2-- block, therefore these specifications are not repeated in the field descriptions below.

For general discussion of these types of data see section 6.8 *Guidelines for Use, Parallel Data and Alternative Script Data.*

The use of the control subfields is described in a special section immediately preceding the 2-- AUTHORIZED ACCESS POINT BLOCK description.

~~Control Subfields~~

~~Only the following control subfields may be used in the 7-- fields:~~

~~$1 Linking Data~~
~~$2 System Code~~
~~$4 Relator Code~~
~~$3 Authority Record Identifier~~
~~$7 Script of Cataloguing and Script of the Base Access Point~~
~~$8 Language of Cataloguing and Language of the Base Access Point~~
