017   OTHER IDENTIFIER (NEW)

Field Definition

This field contains an identifier, published on an item that cannot be accommodated in another field and a qualification that distinguishes between identifiers when more than one identifier of the same type is contained in a record. The field corresponds to the ISBD Resource identifier and terms of availability Area. The field may contain the terms of availability and/or price, even if it does not contain an identifier.

Occurrence

Optional. Repeatable with different first indicator values when more than one type of identifier is used; repeatable with the same first indicator value when more than one instance of a specific type of identifier is to be recorded.

Indicators

Indicator 1: Type of identifier
- 7　　　　System specified in subfield $2
- 8　　　　Unspecified type of identifier

Indicator 2: Difference indicator
- 0　　　　No information provided
- 1　　　　No difference
- 2　　　　Difference

The second indicator position contains a value that indicates whether there is a difference between a scanned *identifier* and the same *identifier* in eye-readable form.

Subfields

$a　　Identifier

A correctly formatted identifier. Numbers or codes are formulated according to type. Not repeatable.

$b　　Qualification

An indication of scope of the identifier in subfields $a (if present), usually the name of publisher, an identification of the binding of the item, or an indication of the relationship of an identifier to a set or to a particular volume. Not repeatable.

$d　　Terms of Availability and/or Price

The price of the item and any comment on its availability. Not repeatable.

$z　　Erroneous Identifier

An identifier that has been identified as being erroneously applied to an item or is otherwise invalid. It may have been allocated to two different publications or products and in this instance cancelled, or it may have been incorrectly printed. If a valid identifier of the same type is not known, subfield $z may appear alone in field 017. Repeatable.

$2　　System Code

An identification in coded form for the system from which the identifier is derived. Use only when the first indicator contains the value 7 (System specified in subfield $2).

Notes on Field Contents

Other Identifiers are unique, permanent, and internationally recognized alphanumeric codes used to identify item. The structure of these identifiers is determined by the agencies formulating them.
