337 SYSTEM REQUIREMENTS NOTE
(ELECTRONIC RESOURCES)

Field Definition

This field is used to record technical information about an electronic resource, such as the presence or absence of certain kinds of codes or the physical characteristics of the file (e.g. recording densities, parity, or blocking factors). For software, data such as the software programming language, the number of source program statements, computer requirements (e.g. computer manufacturer and model, operating system, or memory requirements), and peripheral requirements (e.g. number of tape drives, number of disk or drum units, number of terminals, or other peripheral devices, support software or related equipment) can be recorded. For remote access items, information about the mode of access may be recorded. The field is equivalent to the ISBD(ER) notes on Systems requirements (Electronic resources).
